Subject: microsoft settlement

Dear People --

I'm writing to express my opinion as being AGAINST the proposed settlement with Microsoft. My understanding of the facts of the settlement is that it will neither prevent the monopolistic practices that were the cause of the suit in the first place -- nor will it stimulate investment in better technologies. Both are ample reasons to send this settlement back to the drawing boards, to come up with something that will help both the consumer and the larger computer industry.

Thanks for taking my opinion into consideration.
